

Alpha Technologies specializes in the IT recruitment of top quality specialists needed for all levels of organization. We are American company based in Wrocław.
We are looking for:

Senior Embedded Software Engineer

Location: Wrocław

Main responsibilities:

- Taking part in concept development and end-to-end system requirements for consumer healthcare devices
- Architecting and designing DSP software components, low-power, wireless communication
- Implementing software for very constrained target platforms (low-power, small-footprint)
- Communicating efficiently within the team and with client engineers to solve complex software challenges

Qualifications:

- Masters Degree (or equivalent) in Computer Science or Electronics Engineering
- Professional experience in embedded software development (across entire software development cycle)
- Proven delivery of software that resides in successful market products
- Significant experience in designing and implementing software in at least one of these areas:
 - DSP (audio processing)
 - Ultra-low power devices
 - Low-power wireless communication
- Strong knowledge of C and leading embedded hardware platforms, e.g.: ARM, MSP430, 8051, PPC, MIPS; and real time operating systems
- Python and continuous integration
- Very good spoken and written English
